

Risk Management Services – Scope of Services

Overview

We identify and assess risks early and manage technical, schedule-related and commercial challenges in a structured and transparent way. This ensures control, planning reliability and strong decision-making throughout every project phase.

Core Services

- **Preventive Risk Analysis**
Early identification of potential failure points and weaknesses — before they turn into issues.
 - **Structured Assessment & Prioritization**
Methodical evaluation based on probability and impact (incl. FMEA / DRBFM alignment).
 - **Risk Mitigation & Action Planning**
Definition, implementation and tracking of effective measures to sustainably reduce risks.
 - **Risk Reporting & Management Transparency**
Clear reports on risk status, action progress and overall exposure — enabling sound decisions.
 - **Integration with Project Management & FMEA**
Seamless connection with project steering and FMEA processes for holistic risk control.
-

Benefits for Clients

- Higher planning reliability and reduced project risks
 - More stable processes and fewer disruptions
 - Clear priorities and efficient resource allocation
 - Well-founded decisions through transparent risk data
 - Consistent and practical end-to-end risk management
-

Engagement Model

- Support during specific project phases or full-cycle risk management
 - Integration into existing PM structures or as a standalone service
 - Scalable from focused workshops to complete risk management processes
-
